ART UNIT	PAPER NUMBER
2143	

DATE MAILED: 10/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

PTO-90C (Rev. 10/03)

-- *The MAILING DATE of this communication appears on the cover sheet with the correspondence address --*

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE **3** MONTH(S) OR THIRTY (30) DAYS,
WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.
- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed
  after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any
  earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *19 July 2006*.

2a)☒ This action is **FINAL**.   2b)☐ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is
closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1-3,6-12 and 15-31* is/are pending in the application.

    4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *1-3,6-12 and 15-31* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☒ The drawing(s) filed on *18 December 2001* is/are: a)☒ accepted or b)☐ objected to by the Examiner.

    Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

    Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

    a)☐ All   b)☐ Some * c)☐ None of:

      1.☐ Certified copies of the priority documents have been received.

      2.☐ Certified copies of the priority documents have been received in Application No. _____.

      3.☐ Copies of the certified copies of the priority documents have been received in this National Stage
application from the International Bureau (PCT Rule 17.2(a)).

    * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)

2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
    Paper No(s)/Mail Date _05/31/06_

4) ☐ Interview Summary (PTO-413)
    Paper No(s)/Mail. Date. _____ .

5) ☐ Notice of Informal Patent Application

6) ☐ Other: _____ .

DETAILED ACTION

Claim Rejections - 35 USC § 112

1.   The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of
> making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the
> art to which it pertains, or with which it is most nearly connected, to make and use the same and shall
> set forth the best mode contemplated by the inventor of carrying out his invention.

2.   Claim 1, 10, 19, 20, 22, 23, 24 rejected under 35 U.S.C. 112, first paragraph, as
failing to comply with the enablement requirement. The claim(s) contains subject matter
which was not described in the specification in such a way as to enable one skilled in
the art to which it pertains, or with which it is most nearly connected, to make and/or use
the invention. The specification does not indicate the <u>path information includes</u>
<u>statistical results</u> indicating whether a plurality of said e-mails were sent via said first
provider server or directly to said second provider server.

3.   The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly
> claiming the subject matter which the applicant regards as his invention.

4.   Claims 1, 10, 22 & 23 are rejected under 35 U.S.C. 112, second paragraph, as
being indefinite for failing to particularly point out and distinctly claim the subject matter
which applicant regards as the invention. The amended claim language states the
"system that provides address change notification <u>to a</u> sender of an e-mail <u>to a</u> client".
From above amended limitation it is not clear which entity is being provided with the
address change notification, therefore making the claim language indefinite.

Claim Rejections - 35 USC § 103

5.   The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set
>
> forth in section 102 of this title, if the differences between the subject matter sought to be patented and
>
> the prior art are such that the subject matter as a whole would have been obvious at the time the
>
> invention was made to a person having ordinary skill in the art to which said subject matter pertains.
>
> Patentability shall not be negatived by the manner in which the invention was made.

6.   Claim 1-3, 6-12, 15-31 are rejected under 35 U.S.C. 103(a) as being

unpatentable over Reilly (U.S. 6,427,164 B1) and Nielson (U.S. 6,405,234 B1).

7.   As per claims 1, 10, 21, 19, 20, 22, 23, 24, 25, 26, 27 & 28 Reilly disclosed an

address change notification deputization service server that provides address change

notification to a sender of an e-mail to a client, the server comprising, wherein when a

first provider server in which a first mail address of a client is set receives an e-mail that

is sent to said first mail address this e-mail is transferred to a second provider server in

which a second mail address of said client is set and, then, when said second provider

server receives an e-mail transferred from said first provider server (Reilly, col.4, lines

44-62). However Reilly did not explicitly disclose that said address change notification

deputization service server receives this transfer, and wherein the path of the e-mail

transferred from said second provider server is checked and only in the case that this e-

mail is received by said second provider server after transferred from said first provider

server, said address change notification deputization service server makes a notification

to the effect that the e-mail address of said client is said second mail address to the

sender of this e-mail, wherein said client is informed of path information concerning

whether said e-mail is sent via said first server or is sent directly to said second provider

server, and wherein said path information includes statistical results indicating whether

a plurality of said e-mails were sent via said first provider server or directly to said

second provider server.

In the same field of endeavor Nielson disclosed that said address change

notification deputization service server receives this transfer, and wherein the path of

the e-mail transferred from said second provider server is checked and in the case that

this e-mail is received by said second provider server after transferred from said first

provider server, said address change notification deputization service server makes a

notification to the effect that the e-mail address of said client is said second mail

address to the sender of this e-mail (Nielsen, col.2, lines 58-67). Wherein said client is

informed of path information concerning whether said e-mail is sent via said first server

or is sent directly to said second provider server, and wherein said path information

includes statistical results indicating whether a plurality of said e-mails were sent via

said first provider server or directly to said second provider server.

(Col.6, lines 11-26 & col.6, lines 40-45).

It would have been obvious to one in the ordinary skill in the art at the time the invention

was made to combine address change server having old to new address change

capability and the ability to send the new address to the sender as taught by Nielsen

with address change notification deputization service server described by Reilly to

facilitate the sender in discovering the new address of a recipient that he/she is trying to

reach from the old address and in turn making the address discovering process more

robust for the user.

8.   As per claims 2 & 11 Reilly-Nielsen disclosed the e-mail address change

notification deputization system according to Claim 1, wherein said address change

notification deputization service server is provided with an e-mail header analyzing

means of extracting and analyzing the e-mail header from said transferred e-mail, and

wherein said e-mail header analyzing means checks said path by analyzing the e-mail

header of said e-mail (Nielsen, col.7, lines 26-35).

9.   As per claims 3 & 12 The e-mail address change notification deputization system

according to Claim 1, wherein a terminal of said client receives said e-mail from said

second provider server, and the e-mail received by the terminal of said client has the

same contents as of the e-mail transferred to said address change notification

deputization service server (Reilly, col.4, lines 44-62).

10.   As per claims 6 & 15 Reilly-Nielsen disclosed the e-mail address change

notification deputization system according to Claim 1, wherein said address change

notification deputization service server has e-mail addresses of a predetermined one or

a plurality of senders that send an e-mail to said client, and wherein the operation of

making said notification is stopped when all the e-mails sent from the e-mail addresses

of said senders have been confirmed to be received by said second provider server

without passing through said first provider server (Reilly, col.6, lines 66-67 & col.7, lines

1-26).

11.   As per claims 7 & 16 Reilly-Nielsen disclosed the e-mail address change

notification deputization system according to Claim 1, wherein said address change

notification deputization service server simultaneously sends a program for rewriting

said first e-mail addresses of said client that is inscribed in an address book of the

receivers of said notification to said second mail addresses at the time when carrying

out the operation of making said notification (Reilly, col.9, lines 34-58).

12.   As per claims 8 & 17 Reilly-Nielsen disclosed the e-mail address change

notification deputization system according to Claim 1, wherein in the case that a sender

of an e-mail to said client is an information distributor, said sender make a contract with

the manager of said address change notification deputization service server such that

said information distributor spontaneously switches said first e-mail addresses for said

client to said second e-mail addresses in the case that said information distributor

receives said notification from said address change notification deputization service

server (Neilson, col.4, lines 59-67 & col.5, lines 1-21).

13.   As per claims 9 & 18 Reilly-Nielsen disclosed the e-mail address change

notification deputization system according to Claim 8, wherein a terminal of said

information distributor is provided with a means of switching the addresses of said client

to the second e-mail addresses in the case that said notification is received from the

manager of said address change notification deputization service server who has made

said contract (Neilson, col.6, lines 56-67 & col.7, lines 1-15).

14.   As per claims 29, 30 & 31 Reilly-Nielsen disclosed a medium that holds a

program for allowing a computer to function as the entirety of, or a part of, the first

provider server in which the first e-mail address of the client is set, the second provider

server in which the second e-mail address of said client is set and the address change

notification deputization service server in the e-mail address change notification

deputization system according to Claim 1, wherein the medium can be processed by a

computer (Reilly, col.4, lines 44-62).

Response to Arguments

15.   Applicant's arguments filed 07/19/2006 have been fully considered but they are

not persuasive.

16.   Applicant argued that Neither Reilly nor Nielson disclose the feature disclosed in

claim 1 that include a first provider server in which a first e-mail address of a client, and

a second provider server in which the second –e-mail address of said client is set.

17.   As to applicant arguments Reilly clearly discloses an e-mail sent to the old

address being automatically forwarded to the new address (col.2, lines 63-67 & col.3,

lines 1-26) and figure 2.

18.   Applicant argued that Neither Reilly nor Nielson disclose the deputization service

that checks the path of the e-mail that is being received by the second provider server.

19.   As to applicant's arguments, Neilson disclosed that new e-mail address is

updated to the header of section of the old e-mail address (col.6, lines 11-27). In

general. The header section contains the path information that is to be taken to reach a

specific destination.

20.   Applicant argued that Neither Reilly nor Nielson disclose that the said client is

informed of path information concerning whether said e-mail is sent via said first server

or is sent directly to said second provider server, and wherein said path information

includes statistical results indicating whether a plurality of said e-mails were sent via

said first provider server or directly to said second provider server.

21.   As to applicants argument Nielson disclosed that the address server stores the

destination address in association with new address. The method also typically includes

the steps of returning the new address, and therefor automatically sending the

electronic message to the new address (col.4, lines 44-62). Therefore the stored

information of the old address with respect to the new address can be used to conduct

the statistical analysis to correlate the old address to the new address.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asghar Bilgrami whose telephone number is 571-272-3907. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3924. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
